EDUCATION

System Engineering, Master of Engineering, Cornell University (GPA: 3.96/4.00) Aug 2025 - May 2026
Data Science, B.A., University of California, Berkeley Aug 2021 - May 2025

WORK EXPERIENCE

Athena.ai, New York, NY June 2026 – Present
Founder

- **ML Model Development:** Built outcome forecasting models in **Python** (pandas, scikit-learn, XGBoost) across sport leagues, including a 24-state base-out **Markov Monte Carlo** baseball simulator and an **XGBoost-Poisson** soccer model and calibrated to output probability distributions rather than binary picks.
- **Data Pipeline:** Engineered ingestion from MLB StatsAPI, Statcast, FanGraphs into Supabase **Postgres** via FastAPI/SQLAlchemy, with scheduled refresh jobs, idempotent writes, and a versioned forecast ledger.
- **Product Build:** Shipped the full stack solo in **Next.js** and **TypeScript** on Vercel, Render, and Railway, with an LLM layer that explains forecast, which gained about 500 registered users in 1 week.
- **Storytelling & Distribution:** Turned model output into daily short-form video, growing the account from 400 to 15,000 followers with no paid acquisition and a 2000-person community driving product decisions.

Whetstone Admissions, New York, NY Mar 2026 – Present
Operations Analyst

- **Full-Stack Development:** Designed and built a live multi-role admissions platform in **Next.js**, **TypeScript**, and **Supabase**, now used by real students, parents, and counselors to book sessions and track applications.
- **Platform Architecture:** Built the entire stack solo (role-based auth, booking system, 2-way Google Calendar sync, deadline tracking, and admin user management) from architecture to deployed, in-use software.
- **Cross-Product Engineering:** Shipped features and fixes across three other live company sites, including routing, Stripe checkout, and contact forms on the Classical course site, and serverless Anthropic + Resend proxies that re-architected a failing subscribe pipeline on an AI literature product.
- **SEO Automation:** Wrote a **Python (BeautifulSoup)** engine auto-injecting metadata (Open Graph, JSON-LD, canonical tags) across 34 marketing pages, re-runnable to survive ongoing site edits.

CVS Health x Cornell SC Johnson, New York, NY Jan 2026 – May 2026
Product Strategy Consultant

- **Client Engagement:** Partnered with CVS stakeholders to grow trips, basket size, and lifetime value among college students; scoped the problem, aligned on success metrics, and presented to the client team.
- **Mixed-Methods Research:** Designed and executed the research behind the analysis (20 interviews, 768 survey responses, in-store audits of 4 competitors), mapping shopping missions and competitive share gaps.
- **Segmentation & Modeling:** Built **K-means segmentation** (601 students → 4 personas) and **OLS regression** in **Python** to find visit frequency top drivers and redirect assumptions and strategies.

Plug and Play Tech Center, Sunnyvale, CA Nov 2024 – Mar 2025
Data Analyst

- **Revenue & Sales Analysis:** Analyzed revenue across 10+ verticals in **Python**, pinpointing a gap to the sales target and breaking down existing, new, and churned revenue to show leadership where to focus.
- **Reporting & Dashboards:** Built 6 interactive **Salesforce** dashboards showing a real-time pipeline view, and a post-event ROI **Excel** report for the Summit that tied attendee and campaign data to pipeline opportunities.
- **Workflow Operations:** Managed fragmented cross-team requests in **Jira**, turning scattered reporting, event, and partnership tasks into one trackable workflow with clear ownership and status across functions.

RELEVANT SKILLS

- **Technical:** Python (pandas, NumPy, scikit-learn), SQL, R, JAVA, TypeScript, Next.js/React, Supabase, Microsoft Suite (Word, Excel, PowerPoint, Visio), LLM/AI integration, REST APIs, Salesforce, JIRA, Tableau, Innoslate;
- **Analysis & Product:** A/B Testing, Brand Marketing, Workflow Design, Reporting, Requirements Gathering;
- **Certifications:** Google Data Analytics, Google UX Design, IBM Product Manager, Inside LVMH; "Data Statistical Analysis on Amazon E-Commerce Platform for Recommender System" in CONF-SPML 2024 (publication).
